

Prepared by Todd Beal

FEMA Region 6 Weather Threat Briefing

Monday June 28, 2021

Disclaimer: The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

Summary of the Upcoming Week

 Threat of heavy rainfall and flash flooding continues today through Wednesday across various parts of the region. Flash flood watches remain in effect today into Tuesday across S NM into W TX.

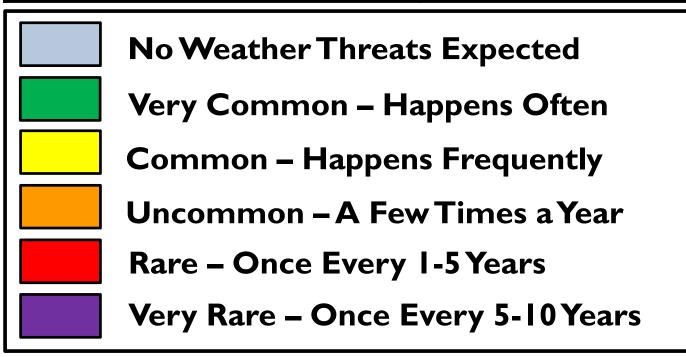

- A tropical wave over the central Atlantic has a medium chance of development as it moves westward this week.
 - No impacts to FEMA 6 in the next 5 days.

FEMA Region 6 Threat Matrix

SR ROC
REGIONAL OPERATIONS CENTER

Jun 28, 2021 - Jul 2, 2021

DAY / THREAT	Mon	Tue	Wed	Thu	Fri
Severe Storms					
Heavy Rain / Flash Flooding	SE NM,WTX	SE NM,WTX,N OK	NM,WTX,		
	NM,WTX, SETX,SW LA,OK	NM,TX,OK	NOK		
Fire Weather					
Tropical Winds / Surge					
Heat					
River Flooding	ОК	ОК	ОК	CETY CAD	CETY AD
	SETX, SAR, LA	SETX, SAR, LA	SETX, SAR	SETX, SAR	SETX,AR

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

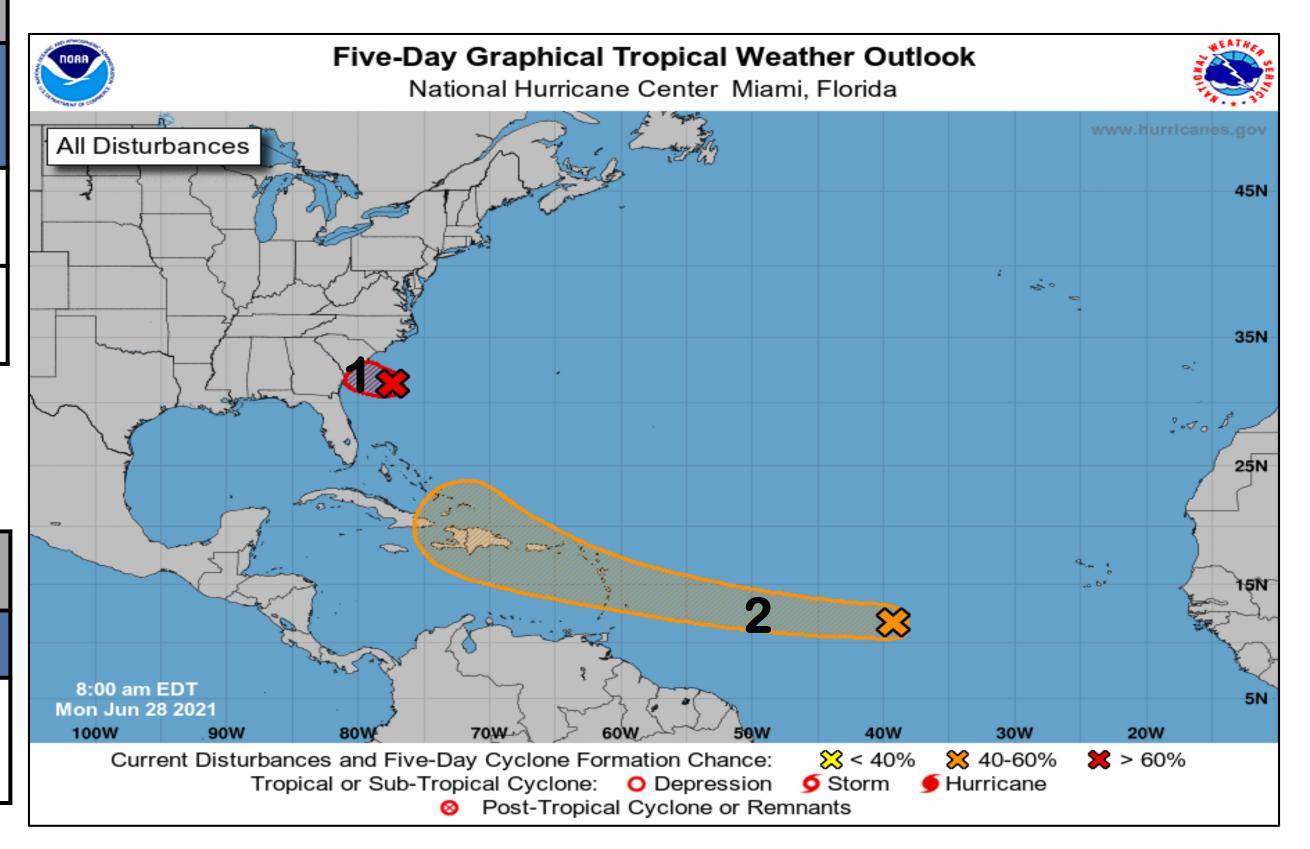

For more details on the colors in the threat matrix refer to the last slide in this briefing.

Tropical Weather Outlook – Atlantic/Gulf

	Areas of Possible Development			
Area	Chance of Development	Potential Impacts to FEMA 6		
1	High	No impacts to FEMA VI.		
2	Medium	None in the next 5 days.		

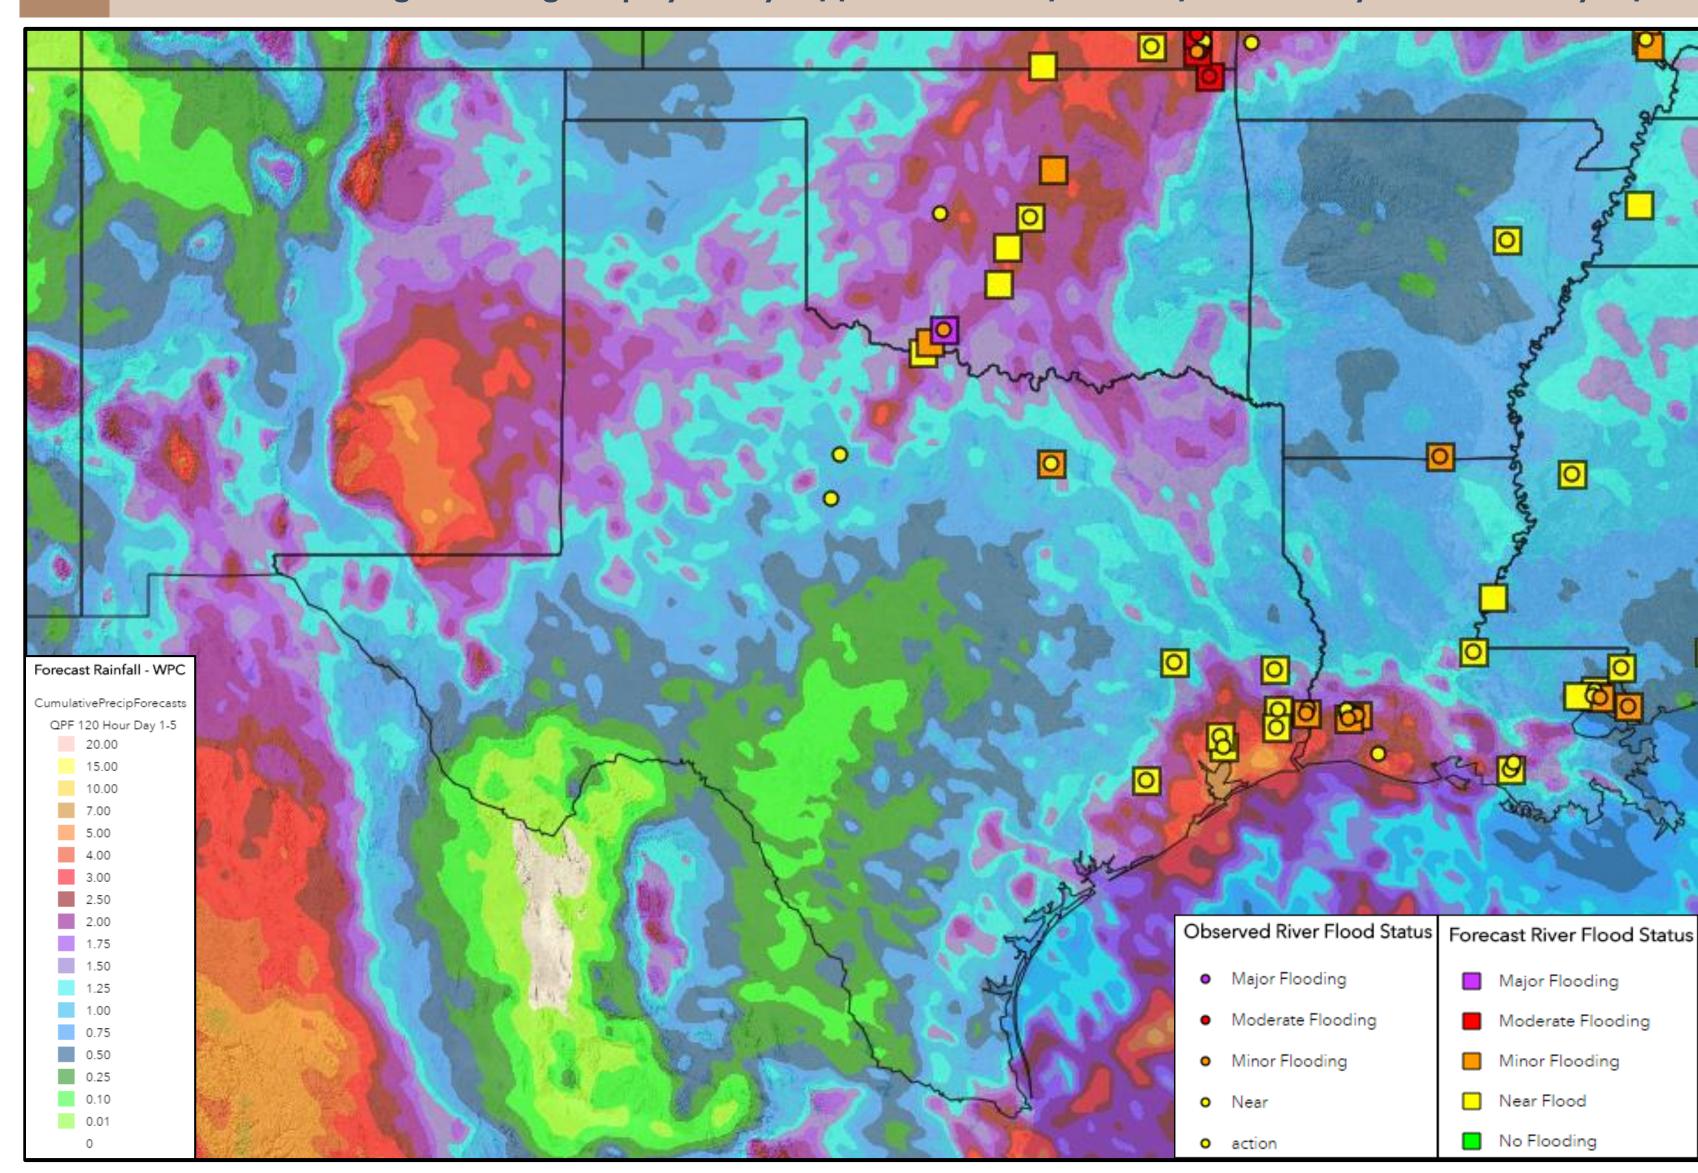

Active Tropical Cyclones			
Storm	Potential Impacts to FEMA 6		

5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Isolated minor river flooding continues across SE TX, AR, and LA with flooding of agricultural, recreational areas and secondary roads.

The Neosho River in NE OK is in moderate flood. Low lying areas around Miami become cut off from easy access. Riverview Park experiences moderate flooding. State Highway 125 near the fairgrounds will be threatened.

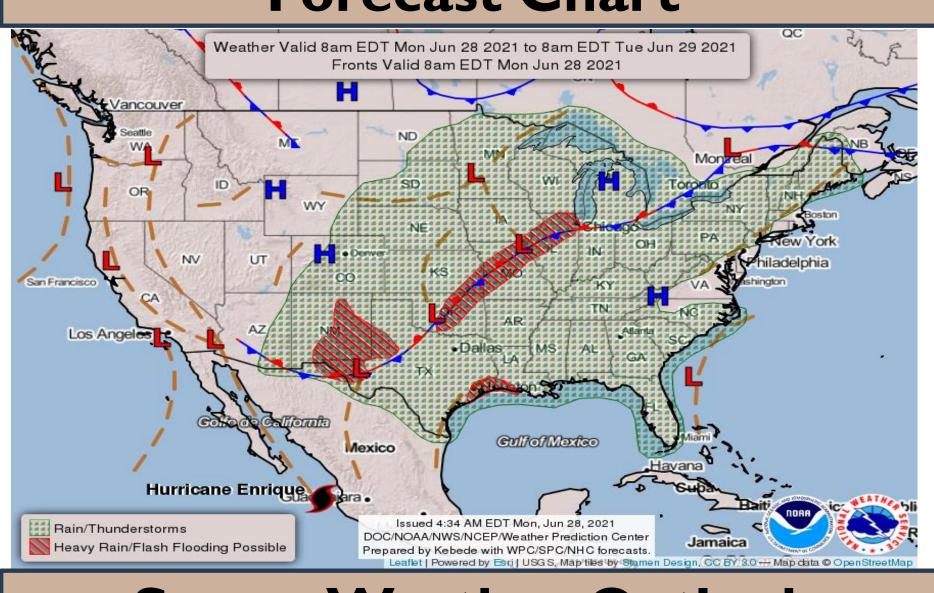

East Cache Creek near Walters in S
OK is in moderate flood and forecast
to reach major flood today. Valleywide flooding of croplands, pastures,
and local roads occurs in southern
Comanche County and Cotton
County

	Weather "Threat" Matrix					
Color	Definition	Criteria	Example(s)			
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	 Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as seabreeze storms in coastal TX 			
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail 			
Orange	Uncommon — A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	 A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected 			
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	 A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue 			
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	 A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long- lived, very widespread and particularly intense storms 			

Criteria for the color codes in this briefing is to the left, please provide any feedback to
